

SUSTAINABILITY POLICY

Office Space Solutions (OSS) seeks to create a culture of excellence in advancing environmental stewardship and sustainability in our daily operations and long term planning.

Sustainability refers to societal efforts that meet the needs of present users without compromising the ability of future generations to meet their own needs. After careful analysis of the company's operations, we have identified specific operational processes where we can reduce: CO₂ emissions, fossil fuel consumption, the solid waste stream and provide usable materials to charitable organizations in need.

Fleet Maintenance and Modernization Plan

OSS business operations have committed to utilizing the most fuel efficient vehicles available for transport and delivery.

Route Planning

Delivery and pickup routes are optimized for team members to reduce the emissions generated and reduce fuel consumption.

Use of E-crates During Relocations

OSS has selected the e-crate product line for all its relocation projects. E-crates require 25% fewer crates than traditional boxes. They are recyclable and have a 100% reuse factor.

Cleaning Materials & Processes

For panel and upholstery cleaning processes the organization has committed to utilizing Green Seal products.

Landfill Diversion

Whenever possible we donate product to Habitat for Humanity's Restores that is at end of useful life from our client's perspective.
